NCE Aquatech Cluster*

NCE Aquatech Cluster

Technology for increased aquaculture based food production world-wide

NCE Aquatech Cluster shall strengthen the cluster partners' sustainability and competitiveness

through:

- Collaboration to develop technology and solutions that enables a sustainable growth within aquaculture food production
- Strengthen the clusters resource and knowledge base
- Stimulate to an increased international market pull, through collaborative market initiatives
- Stimulate the clusters entrepreneurship and investor attractiveness

Global megatrends drives demand for technology

Global food demand will increase with 69% towards 2050 – lack of suitable areas for production

«A global challenge»

How can we utilize more of «mother earth» for food production – it's 70% ocean!
