29 September 2022

EC: S3 Blue Economy Smart Specialisation Platform

- Developed out of the Blue Economy Call 18 months ago.
- EATiP is in discussion with DG MARE on this issue – in turn in discussion with DG REGIO who lead on it.
- All parties wish it to happen...
...but how?
- Regional authorities required to note aquaculture as a priority.
- A Blue Economy Platform to be established.
- Events in October online and in person.
(Week of the Regions / 25 October 2022)

EC: S3 Blue Economy Smart Specialisation Platform

- If interested, familiarize yourself with the concept:
- Quite complex / not intuitive/ much terminology... In short:
- Innovation transfer vehicle
- Interregional basis.
- EATiP / Mirror Platforms (and others) very well positioned to enact this.
- MiPs have already identified 9 areas of priority / engagement.
- Different levels of innovation can be identified – from the commercial to network building.
